

Future Force Warrior (FFW)

- S&T Integration program structured to leverage cutting edge technologies
- Full spectrum individual protection
- Fully networked and integrated communications, position/location, mapping, sensors, situational awareness and synchronization of fires
- Leverages firepower of Future Force platforms
- System of Systems concept maximizing effectiveness of individual Soldier and team operations
- Compatible with Future Combat System Increment I, and capable of operations independent of FCS
- Integrated C4ISR and Netted Fires for small team with real time linkages to UA and Joint networks
- 24 hour autonomous mission duration capability for small team ops
- Weight reduction to 50 pounds average fighting load per Soldier
- ATD Emphasis on Dismounted Soldier, with hooks for expansion to develop variants for ALL Soldiers in UA
- END STATE: Demonstration of a holistic set of capabilities and transition to PEO Soldier for Land Warrior III and FCS Increment I

A Revolutionary Capability for the Future Force
